

April 23, 2014

To: Dr:

Anthony Paglia MD, PA.

In all my years I have never met a kinder soft spoken doctor. You are a God sent to all your patients, your soft voice and the way you treat all your patients. You are a great access to your profession, and you show it through your work. Your staff are wonderful and very special too. It has been a pleasure to have met you, and be one of your patient.

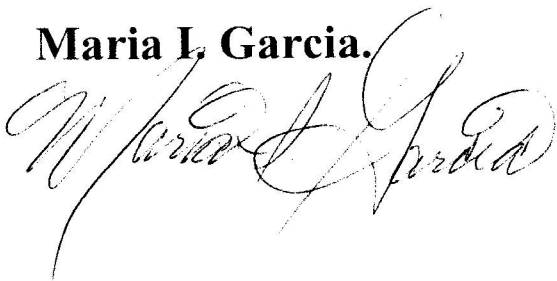

Doors will open for you in your professional work, and they will take you where you have never been before. You are a special doctor, and you will see soon all the great and wonderful things that will happen to you. Keep up the good work you are deserving of being called a doctor.

I want to say that when you did a procedure on me on 4-23-14. It was a simple procedure. and when I arrived home I went to sleep. When I woke up I was in pain even though I took my pain pills. I called your office it was after office hour. I was so surprise to hear from you within 15 minutes. I never expected to hear a soft kind voice, to make me feel better. The way you explained the procedure and what you did for me. I followed all the things you told me, and I felt better.

Your patient who will never forget your kindness.

Thank you very much,

Maria I. Garcia.
